PROFESSIONAL SUMMARY

Results-driven **Senior QA Engineer** with **7+ years of experience** in manual and automation testing across enterprise, SaaS, web and mobile applications. Skilled in designing and executing test strategies, developing automation frameworks, and ensuring software quality through functional, API, database, regression, and end-to-end testing. Proficient in **Java, Selenium WebDriver, Cucumber (BDD), Rest Assured, Postman, SQL, Jenkins, Git, Jira, and CI/CD** within Agile environments. Strong expertise in defect management, root cause analysis, and cross-functional collaboration, with a proven ability to deliver reliable, high-quality software and support continuous improvement throughout the SDLC.

TECHNICAL SKILLS

- **OS/Languages:** Window, IOS / Java, SQL, JavaScript and Playwright
- **Testing Tools:** Selenium, Jmeter, Cucumber, Postman, MySQL, API, TestNG.
- **Frameworks:** Cucumber (BDD), Data-Driven Testing (DDT), and Hybrid Models
- **API Testing Tools:** Postman, Rest Assured
- **Project Management/Bug Tracking Tools:** Azure DevOps, Jira
- **Mobile Testing:** Appium
- **Build Management Tool: / Version Control Tools:** Maven/ Git/GitHub
- **RDBMS:** Oracle, MySQL Server
- **CI/CD Tools:** Git Action, Jenkins
- **Dockers**

WORK EXPERIENCE

Barnksforte Technology Ltd || QA Lead || Till Date

- Led and managed a team of QA engineers, setting testing priorities and ensuring successful project delivery.
- Defined, improved, and implemented QA processes, tools, and testing standards across multiple projects.
- Planned and managed test coverage from project initiation through closure, ensuring alignment with scope and requirements on functional and non-functional testing
- Developed comprehensive testing strategies and test execution plans in collaboration with development and product teams.
- Developed Test Automation framework and processes to improve testing efficiency, accuracy, and regression coverage
- Ensured effective defect identification, documentation, tracking, and timely resolution.
- Applied diverse testing techniques including, shift left, grey box, black box testing and automation.
- Mentored and coached QA team members, supporting skills development and knowledge transfer.
- Managed all testing activities on assigned projects, including effort estimation, progress tracking, and status reporting.
- Delivered clear QA metrics, dashboards, and reports to stakeholders, ensuring transparency and accountability.

AllianceTek | QA Automation Engineer || July 2022 – 2024 || (Remote)

- Developed and maintained Java Selenium WebDriver and Cucumber (BDD/Gherkin) automation frameworks for functional, regression, and end-to-end testing.
- Executed functional, integration, regression, smoke, sanity, API, database, and end-to-end testing across enterprise applications.
- Automated REST API validation using Postman and Rest Assured; verified request/response integrity and business logic.
- Performed backend database validation using optimized SQL queries to ensure data accuracy and consistency.
- Managed defect lifecycle using JIRA, including defect logging, tracking, verification, and root cause analysis.
- Built and maintained Jenkins CI/CD pipelines for automated test execution and continuous quality validation.
- Performed test code reviews, framework optimization, and collaborated with cross-functional Agile teams to improve software quality.

Spirit Airlines, FL || QA Engineer Tester ||Feb. 2020 –May 2022 || Remote

- Developed and Setup the Automation framework using Selenium WebDriver to run test cases in multiple browsers and platforms.
- Performed Grouping of Test Cases, Test Methods, and Test Suits for regression and functional testing using the TestNG annotations (Groups, Parameter, Data Provider, and Tags).
- Verified software installation, upgrade, rollback, and uninstall processes across Windows environments.
- Developed test scripts to implement test cases, test scenarios, and features for Mobile application
- Tested REST APIs using Postman and used available JavaScript methods to validate status codes and verify items from our response body.
- Reviewed database test cases according to assigned Requirements to validate reports by retrieving data with SQL queries from the oracle database. Performed End-to-End testing of database to check data integrity using SQL queries

Multi-Tech Services Consultant Company || Technical Support Engineer || May 2012 – 2020

Responsibilities to Clients:

- Provision of technical support on ICT projects to clients:
- Technical sales and after sales support
- Desktop/laptop window OS/application helpdesk support, software installation hardware integration, preventive maintenance implementation and security updates/monitoring
- Down to component level troubleshooting and repair of failed high-tech / electronic systems hardware, logic / PLC boards, power panels PCB of electromechanical systems, inverter systems and other
- LAN Installations, Structural cabling, Router configuration and network installation for workstations and IP phones PABX CCTV installation and implementation.
- Window OS and application Software installation configuration and administration.
- Installation of PABX an CCTV deployment for on-premise and remote view access
- Systems software / hardware integration for Ship's Bridge Simulators, Engine Room Simulators (ERS), Liquid Cargo Handling Simulators (LCHS) d. GMDSS Simulators
- Helpdesk support, software/hardware preventive Maintenance implementation and security updates/Monitoring

KEY ACHIEVEMENTS

- Designed and developed Testing Framework for high Quality Assurance procedures and practices
- Conducted API testing using Postman and automated API validations with Rest Assured
- Developed and implemented measures and procedures to manage implement preventive maintenance on IT Systems and infrastructures
- QA Team Leadership & Mentorship

EDUCATION & TRAINING

B.Eng. *Electrical Electronics Engineering*: **Enugu State University of Science and Technology Enugu**,

Certified HP Technician: ***Hewlett-Packard***

Certified SDET Automation Engineer **Syntax Technologies Virginia USA**

No code/Low Code Ai Automation **Loubby/Divverse Lab**
